WHAT IS EMAIL ‘ENCRYPTION’?

Encryption is a method of converting an original message of regular text into encoded text. The text is encrypted by means of an algorithm (type of formula). If information is encrypted, there would be a low probability that anyone other than the receiving party who has the key to the code or access to another confidential process would be able to decrypt (translate) the text and convert it into plain, comprehensible text.

WHAT IS 'PII'?

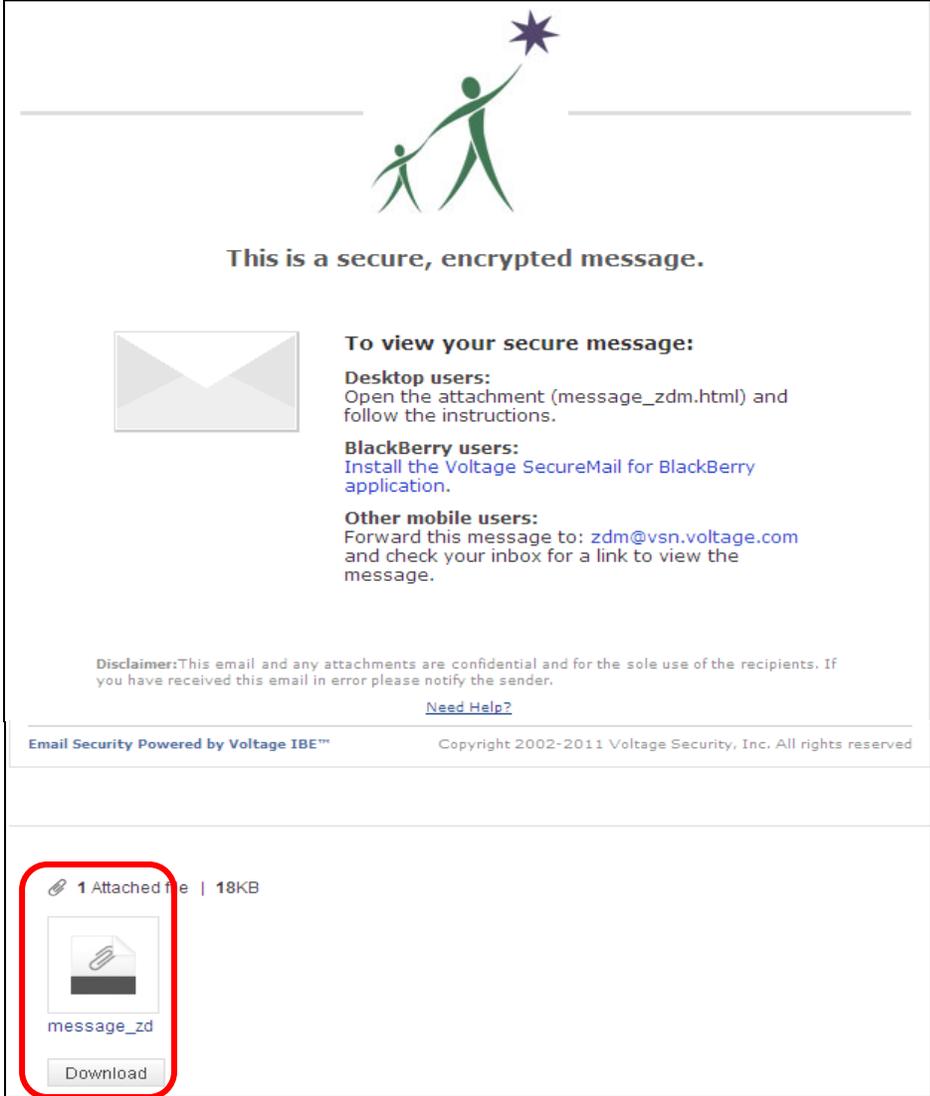

Personally Identifiable Information (PII) is any information that can be used, alone or in conjunction with any other information, to identify an individual. PII includes any information that can be used to search for or identify individuals, or can be used to access their files. Examples of PII may include: name, Social Security Number, Social Security benefit data, date of birth, official State or government issued driver's license or identification number.

HOW WILL I OPEN AN ENCRYPTED EMAIL?

Email will go to recipient's email looking something like this:

Recipients should follow the instructions given in the email:

This is a secure, encrypted message.

To view your secure message:

Desktop users:
Open the attachment (message_zdm.html) and follow the instructions.

BlackBerry users:
[Install the Voltage SecureMail for BlackBerry application.](#)

Other mobile users:
Forward this message to: zdm@vsn.voltage.com and check your inbox for a link to view the message.

Disclaimer: This email and any attachments are confidential and for the sole use of the recipients. If you have received this email in error please notify the sender.

Open the attachment:

Click the “Read Message” button (it may take a few seconds to load)

HOW DO I REGISTER WITH VOLTAGE (ENCRYPTION SOFTWARE PEOPLE)?

First time users will need to register with Voltage:

Create Your Human Services Department Secure Email ID

Name:

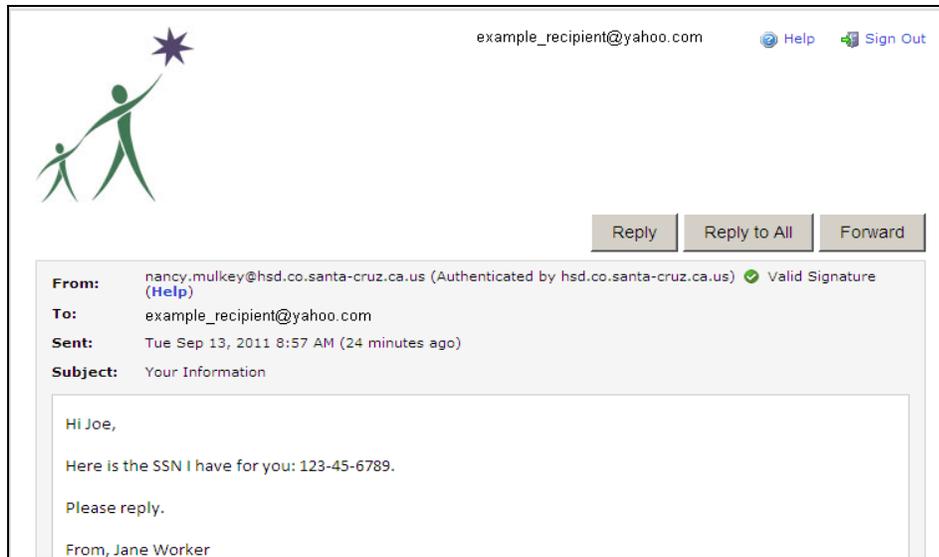

Email Address: example_recipient@yahoo.com

New Password:

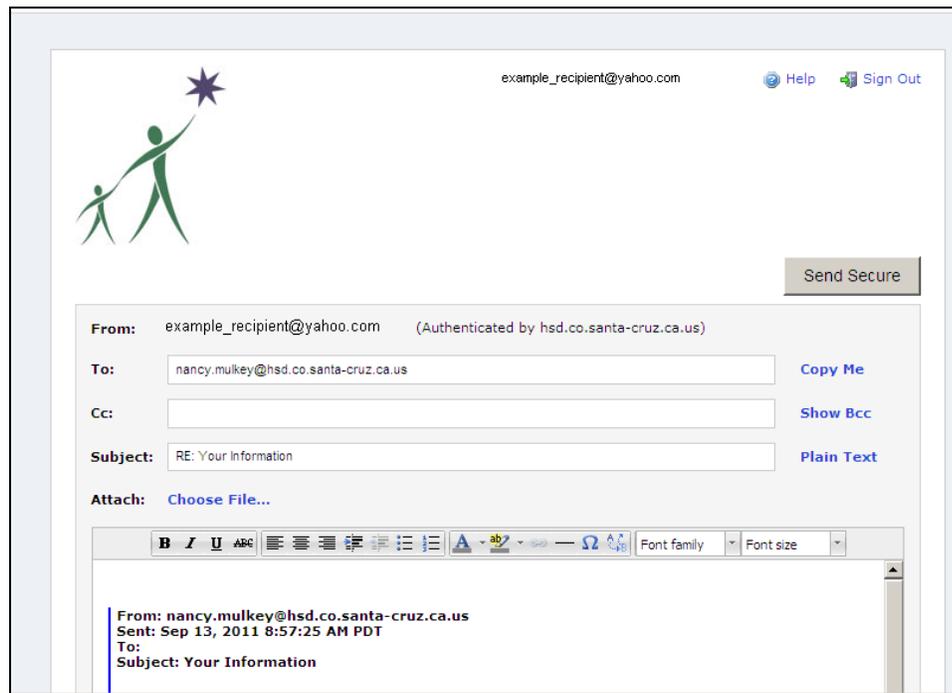

Verify Password:

The recipient fills out their Name and enters a Password (no particular password conventions). They should make a note of their password.

When they click Continue, the email will appear. It looks different than a regular email:

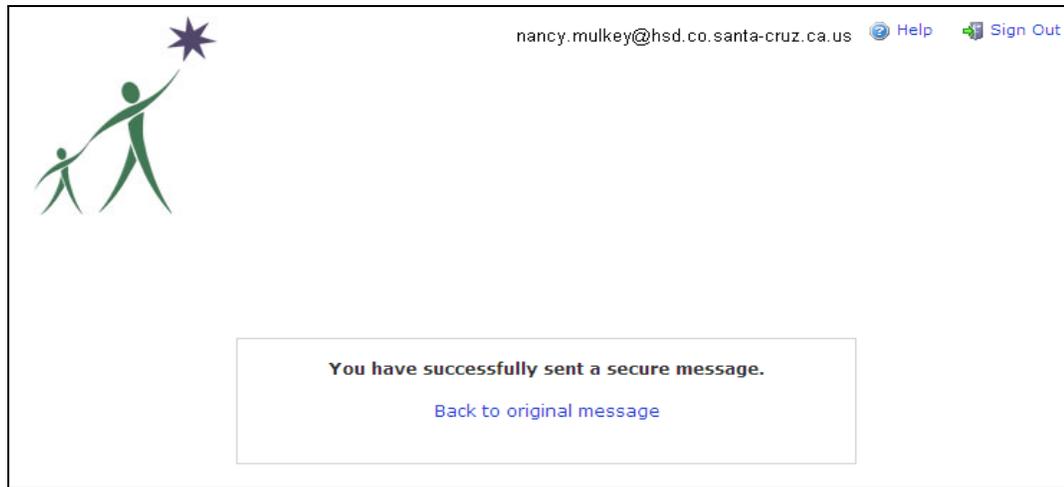

The recipient can reply to the email by hitting Reply, type their message, and then click on the Send Secure button:
